

A Report

Analytical Method Development and Validation Perspective

Date of Event: 25/08/2018

Conducted by: Mrs. Madhuri Jain, Glenmark Pharmaceuticals Ltd., Nashik

Number of Students present: 20

The Lecture was conducted for 3rd Semester M. Pharm students. Those conducting analytical research project.

In her lecture, madam has described the theoretical aspects of analytical method development with special consideration of HPLC method development.

She had discussed in detailed about the selection of stationary phases, mobile phase selection and selection of detector according to the type of analysis to be perform.

The lecture was extended to the method validation, where madam elaborated the common terminologies used in analytical method validation, regulatory importance and various regulatory agencies described analytical method validation.
