

### **Programme Outcomes**

An Electronic and Telecommunication Diploma Holder shall –

- P01)** Design electronic and telecommunication circuits and analyze, design and interpret data.
- P02)** Design digital and analog systems. Use modern engineering tools, software and equipments like Express PCB, Eagle, handling of DSO, Embedded system software like Keil, SPJ, VLSI Design and simulation software like Xilinx to analyze problems.
- P03)** Demonstrate knowledge of advanced communication system, embedded systems, VLSI, Mobile communication, Control systems etc.
