There is huge potential for indigenous and outsourced clinical research in India. Such knowledge resides with specialists, such as clinical research associate, clinical team leader, project manager, clinical supply manager, quality assurance manager, medical and regulatory affairs manager, data manager and head of clinical operations. Training of these professionals in GCP standards would go a long way to strengthen the CR industry. Specialized training requirements may include, training on clinical trial process, development of standard operating procedures and GCP and applicable regulatory guidelines. Only few of the present requirement of the trained persons presently required in the healthcare industry are trained and certified annually. As there is no certificate course available in Nashik region about pharmacovigilance and hence the awareness of this course is concealed from the mind of students. There are some course running in Mumbai and Pune but the cost of course is not affordable to students which belongs to poor financial background or from rural region.

In order to bridge this gap MET's Institute of Pharmacy had taken initiative in collaboration with Inclination, Mumbai in order to sensitize the student with this untouched field and conducted a Certificate Course in Pharmacovigilance very affordable fees. The fees for course was decided Rs. 4720/- per student including GST. The tenure of course was decided 3 months. The class room sessions were conducted on every odd Saturday. The syllabus was designed as per the Inclination and some suggestions from PV Scientist working with renowned companies like TCS, Cognizant. The demonstrative/promotional lecture was arranged on 12th Aug. 2017. Total 36 students

enrolled for course from MET's Institute of Pharmacy, Sandip Institute of Pharmaceutical Sciences, R. G. Sapkal College of Pharmacy, Sir Dr. M.S. Gosavi College of Pharmaceutical Education and Research. Along with class room sessions, students were familiarized with some important aspects of PV including ADR and Drug Dictionaries, Signal detection, strengthening and analysis and software Safety databases - ARGUS and ARISG along with live demonstration. Students were provided with free login id and password in order to access Inclination Android App for study material, E-learning portal to access study material.

The course coordinator had conducted weekly assignment from MOODLE App, group discussions, case studies and case presentation from students as a part of course. The examination pattern was decided as MCQs, Problem Solving, Formative Assignments, Written Test, Viva Voce and Case Studies. The final examination was conducted on 3<sup>rd</sup> June 2018. ## Thoughts of a girl...

*I know that you love me  
I know that you'll help me grow  
I know I'll not get a moment  
Of sadness or sorrow.*

*I know you advise me for my good  
I know you're there for me  
But I just want to try  
And leave my hand and see.*

*Just see how I will find my way  
N rise up to speak  
I know you'll be proud of me  
And understand I'm not weak.*

*Just me give me all the space I need  
Trust me and leave m free  
Just watch me as I grow  
And see what I'll prove to be...*
