

Training and Placement Programme

The institute's Training & Placement Cell is actively involved in student placement, project work, and industrial training. T&P Cell's goal is to plug the gap between academic institutions and the pharmaceutical business so that students can improve their skills and become employable. Cell's primary responsibility is to connect with the human resources departments of global pharmaceutical corporations and deliver resumes for appropriate employment openings.

Cell organizes group discussions, pre-campus placement training, and aptitude tests for pharmacy students to improve their prospects and career progression. It also conducts student's visits to pharmaceutical firms to improve the present scenario of pharmaceutical technology.

Goals of cell:

- To get in touch with international corporations to set up campus hiring.
- To offer career-enhancing advice to students.
- To strengthen the institute-industry collaboration.
- To facilitate campus interviews with prominent organizations and industries for final-year students.
- To arrange aptitude tests, group discussions, and professional trainers to help students be ready for technical and HR interviews in order to get them ready for campus interviews.
- To encourage career counselling by senior corporate staff and most significantly, the senior students who were placed right away will give guidance lectures.
- Sustaining consistent communication with the industry through conferences, corporate meetings, seminars, guest lectures, etc.
